

Project Development phase

Project Development delivery of sprint 3

Team ID	PNT2022TMID31458
Project name	Smart crop protection system for agriculture

Flow chart:

Concept:

Crop protection is the general method or the practice of protecting the crop yields from different agents including pests, weeds, plant diseases, and other organisms that cause damage to the agricultural crops.

Advantages

- Remote Management. With farms being located in far-off areas and distant lands, farmers are seeking a better solution to their management issues. ...
- Real-Time Crop Monitoring. ...
- Crop Protection. ...
- Soil Testing & its Quality. ...
- Real-time Analysis of Soil Demand. ...
- Smart Greenhouses.
